# Harmon's Fine Oriental Poppies

LIBRARY  
MAR 30 1943  
U. S. Department of Agriculture

These vivid colored flowers are becoming more popular every year. We offer new varieties that add dash and exotic beauty to your garden. Flowers are very large on tall stiff stems. Colors range from pure white through many shades of orange, pink and red, to wine-purple.

Consider their ease of culture, dependability for producing fine, large flowers, their hardiness and ability to thrive in almost all soils. They give large dividends for the little effort and time required to care for them.

### THE PLANTS WE SELL ARE GROWN FROM ROOT DIVISIONS

All are two-year-old field grown plants. They generally bloom the first year after planting and are very much superior to common seedlings usually sold at a cheap price. We guarantee them to be true to name and color.

Complete cultural directions are sent with each order. Poppies like a well drained soil but they are not particular whether it is clay, sandy limestone or acid. Leaf mold, well rotted cow manure and bone meal are the best fertilizers for them

## SNOWFLAME--- The Latest Sensation in Oriental Poppies

(Plant patent No. 365). The lower half of the flower is pure white, the upper half a flame-orange, creating a most unusual and brilliant effect. The orange band of the upper half of the petal varies considerably in width with each flower, helping increase the charm of this rare variety. Happily Snowflake is a very strong grower and blooms freely. It is not subject to any ailments or insect pests. In fact, it is one of the strongest growing varieties we have. The flowers are large and grow on stiff stems. A few clumps of Poppy Snowflake in your garden will create nothing short of a sensation. From August until the end of the fall planting season we send field-grown roots. 60 each, 3 for \$1.75, 12 for \$5.50.

## New Varieties of Oriental Poppies

These varieties have been tested and found very satisfactory. Strong growing, hardy and very desirable. This is the first year we have offered these five varieties 75c each 3 for \$2.00 or all five for \$3.00 prepaid.

**AUSTRALIA**—Tall rigid stems and massive flowers of rich dark red. An outstanding variety.

**BARR'S WHITE**—Large flowers of tall strong stems. Rich velvety sheen of pure white except at extreme base of petal. A very fine variety.

# Ginnala Maple

If you have tried Japanese Maples and found them wanting in hardiness, you should be interested in the offering made by Harmon Nursery, Box F, Prospect, Ohio, of *Acer ginnala*. In it we have a really hardy Maple of shrub-like growth (to 20 feet) with beautiful foliage, especially in autumn, when it takes on its brilliant red color. A beautiful shrub for the small garden.

The Ginnali Maple is NOT red all summer. The small, delicately shaped leaves are red and pink as they come out in the spring and eventually turn to a light green. The new leaves that come out thru the summer have the pink and red tints, and along with the green, it makes an attractive little tree. They are very hardy and easy to transplant. They grow more like a well branched shrub, with a nice full top, but they can be trimmed into a tree form by cutting off the lower branches. They are clean, and make a nice well behaved specimen, either as a low trimmed bush or can be developed into a fine looking small tree. They will grow to 20 feet, but can be kept much lower by trimming thru the summer. This induces new growth and nicer colors also. The autumn colors after frost are vivid red and deep orange. Very striking.

Price on nice transplanted trees, 2 1-2 to 3 feet tall:  
\$1.25 each, 3 for \$3.00, 6 for \$5.00, 12 for \$9.00; prepaid

Larges trees: 4 to 5 ft. \$2.00 each, 3 for \$5.00; prepaid.

5 to 7 ft. \$3.00 each, 3 for \$7.50; prepaid.
